

The show is over but we're just getting started

For the second year in a row, Calgary hosted the Solar Canada Conference & Exposition, Canada's largest solar event. The Cachelan team was thrilled to attend this event for yet another year, as we always enjoy connecting with our clients and industry colleagues and keeping up with Canada's solar energy conversation. The conference boasted close to 2,200 registrants across the Canadian and global solar supply chain, reflective of the strong national and global interest within the solar energy industry and its growth. Stay tuned and keep up with us by visiting cachelan.com

Here are some topics we talked to our customers about during the show:

- Solar portfolio management with [SolarVu Lite](#)
- Current real time views with [SnoCam](#) application
- [MicroGrid](#) monitoring systems
- [SCADA](#) requirements
- [More...](#)

Thank you to all the exhibitors and attendees who visited our booth. Didn't catch us as the show? Don't worry, there is more to come - [contact us](#) for monitoring and software on your next project. We continue to support our portfolio customers, and are supporting new projects from rural, off-grid battery connected solar sites to multi-MW utility scale projects – and everything in between.
